

Listen**TALK**

SOLUTIONS GUIDE

The ListenTALK Solution

Distance, noise, and language barriers can make it difficult to hear and understand.

Listen Technologies creates solutions that remove barriers so you can provide exceptional and inclusive experiences.

ListenTALK is a portable one or two-way communication system that's perfect for multiple applications and venues, including assistive listening, guided tours, training, group communication, language interpretation, and more.

Guided Tours

Assistive Listening

Training

Group Communication

Language Interpretation

Tours and Training

Whether conducting training on a noisy plant floor or leading a VIP tour through the facility, ListenTALK allows clear communication without straining the presenter's voice. Ensure all participants can engage and understand while fielding questions and providing real-time feedback.

Case Study: See ListenTALK in a Fulfillment Center in Ohio

ListenTALK changed how a fulfillment center in Ohio ran its tours and increased its effectiveness by providing a more engaging tour.

- Enables participants to hear in every environment
- Easily pair on-the-go with near-field communication (NFC)
- Ask questions through onboard mic or headset

Read more about how ListenTALK improves efficiency by ensuring everyone can hear, understand, and engage in important discussions.

LK-1 Transceiver

Talk Button

Use to facilitate communication

USB Port

Charge and program units individually, or in bulk via docking station

Portable Assistive Listening

Assistive Listening

ListenTALK is a simple and reliable portable solution for assistive listening in a variety of environments where an installed technology is not feasible such as schools and corporate facilities.

Case Study: See ListenTALK in a School

Using ListenTALK transceivers, one unit is used as the teacher's microphone with attached headset. Hearing-impaired students wear a transceiver using their own headset or neck loop direct to hearing aid.

- Compatible with any headsets or earbuds with a standard 3.5 mm jack
- Meet local compliance laws for assistive listening
- Facilitate greater collaboration and engagement

Read more about how ListenTALK helps foster inclusion through assistive listening and language interpretation.

Accessories

System Recommendation

• LKS-4 ListenTALK Portable ADA Kit

This portable system is easily transported and stored in its own carrying case and is ready to use in less than a minute. The LKS-4 meets the American's with Disabilities Act (ADA) requirement for assistive listening for rooms with a seating capacity up to 75.

LA-438

Transmit audio direct to telecoil-equipped hearing aids or cochlear implants

LA-436

Microphone Input/Headphone Output Cable
Great for connecting to room audio

LA-480

Docking Station 16
Easily charge, store (mountable), and pair/program

Interpretation

ListenTALK is breaking the language barrier. Whether you need to provide seamless communications in a courtroom, or accommodate foreign language visitors in the office, ListenTALK is the perfect solution supporting up to 20 languages in the same space.

Case Study: See ListenTALK in a Courtroom

ListenTALK ensures that attorneys, clients, the judge, and members of the jury can effectively hear and communicate when needed, without the risk of interrupting important proceedings.

- Receive and transmit language interpretation from a single unit
- Easily sanitize the entire system between uses
- Transmits secure audio to paired devices within a 100-meter radius indoors

Read more about how ListenTALK ensures guests can listen and engage in their native language to participate more fully.
